Education

Degree	Institute / Board	GPA	Year
Master of Science	California State University, Northridge — Business Analytics	3.95	Exp. 2027
Certificate	University of California, Los Angeles — Digital Marketing & Business and Management of Entertainment	3.7	2024
Master	SKEMA Business School, Lille, France — Management	3.5	2024

Experience

MARKETING ASSISTANT WOC Therapy, Los Angeles, CA

04/2025 – 12/2025

- Promoted newly launched fitness and therapy classes through local community outreach, growing attendance from a standing start to roughly 10 students per class
- Built relationships with local health and wellness professionals, securing 3 rental partnerships that expanded studio offerings
- Developed, presented, and implemented new financial plan identifying avoidable expenses, contributing to an estimated 5-8% increase in net revenue
- Assisted with planning and executing wellness events, ensuring smooth operations and client experience

SALES REPRESENTATIVE SMB Marketing, Los Angeles, CA

07/2024 – 02/2025

- Recruited and trained team of 10 sales representatives, screening LinkedIn applicants through first-round interviews and onboarding new hires via group training and shadowing
- Managed team's day-to-day performance against KPIs, driving approximately 400 new client acquisitions per month and an estimated \$20,000-\$50,000 in new monthly recurring revenue across team
- Served as event coordinator to expand clients' market share, exposure, and ROI
- Drove \$500,000+ in sales revenue for Fortune 500 companies and nonprofits

MANAGER & VICE PRESIDENT BNEM, Lille, France

03/2021 – 12/2024

- Internal Vice President: Led internal communications and HR processes, including recruitment, for small team, improving employee retention and strengthening cross-team collaboration
- Commission Manager: Designed and analyzed quantitative surveys, presenting findings and policy recommendations directly to government stakeholders for organization's largest studies

Projects

CREDIT RISK CLASSIFICATION MODEL Team Capstone, CSUN (BANA 620)

Spring 2026

- Built end-to-end scikit-learn pipeline (cleaning, leakage removal, feature engineering, ColumnTransformer for reproducible preprocessing), enabling reliable loan risk-grade predictions on unseen applicant data
- Trained and compared four classifiers (Logistic Regression, Decision Tree, Neural Network, Random Forest) using ROC-AUC, selecting Logistic Regression (AUC = 0.77) as best-performing model
- Ran cost-sensitive threshold analysis, recommending 0.10 decision threshold that favors rejecting risky loans over approving them to minimize costly defaults

STOCK DATA PIPELINE Independent Python Project

Spring 2026

- Built Python pipeline pulling live daily equity data from REST API, with error handling for failed requests, timeouts, and invalid responses so program degrades gracefully instead of crashing
- Parsed and transformed raw JSON into calculated metrics (volatility, percent change, buy/sell/hold signals), storing and querying results using SQL, surfacing hold recommendation based on positive price momentum offset by volatility too high to justify risk

Technical Skills

- **Programming & Data:** Python (requests, error handling, SQLite), SQL, REST APIs, data pipelines, data visualization; currently building AI agents in coursework
- **Marketing & Analytics:** Social media marketing, content creation, market research, data analysis, quantitative surveys
- **Languages:** French (Native), English (Bilingual)

Key Courses Taken

- **MSBA (CSUN):** Database Management, Data Visualization & Communication, Data Mining & Predictive Analytics, Programming, AI Governance, Prescriptive Analytics for Business
