Education

Degree	Institute / Board	GPA	Year
Master of Science	California State University, Northridge — Business Analytics	3.95	Exp. 2027
Certificate	University of California, Los Angeles — Digital Marketing & Business and Management of Entertainment	3.7	2024
Master	SKEMA Business School, Lille, France — Management	3.5	2024

Experience

MARKETING ASSISTANT WOC Therapy, Los Angeles, CA *04/2025 – 12/2025*

- Developed, presented, and implemented new financial plan identifying avoidable expenses, contributing to an estimated 5-8% increase in net revenue
- Grew attendance for newly launched classes from a standing start to roughly 10 students per class through local community outreach, and secured 3 rental partnerships

SALES REPRESENTATIVE SMB Marketing, Los Angeles, CA *07/2024 – 02/2025*

- Managed team of 10 sales representatives against KPIs, driving approximately 400 new client acquisitions per month and an estimated $20,000-$50,000 in new monthly recurring revenue
- Drove $500,000+ in sales revenue for Fortune 500 companies and nonprofits

MANAGER & VICE PRESIDENT BNEM, Lille, France *03/2021 – 12/2024*

- Commission Manager: Designed and analyzed quantitative surveys, presenting findings and policy recommendations directly to government stakeholders for organization's largest studies
- Internal Vice President: Led internal communications and HR processes, including recruitment, for small team, improving employee retention and strengthening cross-team collaboration

Projects

AMC: FROM BOX OFFICE TO BALANCE SHEET 4-Project Series, Personal *Fall 2026*

- Built a quarterly dataset by parsing every AMC 10-Q/10-K (SEC XBRL) and tested 28 attendance forecasts on 18 out-of-sample tests, forecasting ~170M U.S. guests next year (8-in-10 range: 151-215M)
- Showed with correlation and event-study tests (permutation p-values) that AMC's 97% stock decline came from share dilution (share count up 70-86x), not attendance
- Modeled debt, costs and cash flow: AMC needs ~168M U.S. guests a year to stop burning cash (165M today) before $3.2bn of debt matures in 2029; published an interactive Tableau survival dashboard

7-ELEVEN JAPAN: WHO PAYS? Personal Project *Fall 2026*

- Mapped 48,973 stores (OpenStreetMap) with permutation tests and a Poisson site model, and showed real sales per store fell ~16% since 2019 using a CPI-based price index, panel regression and ARIMA
- Built a franchise P&L calibrated to Seven & i's accounts (2,000 Monte Carlo runs) showing rising wages fall on store owners; valued the Japanese stores at ~5x EBITDA (sum-of-the-parts) with an event study

AIRBNB IN LOS ANGELES: WHO THE HOSTS ARE Personal Project *Fall 2026*

- Used SQL, regressions with host-clustered errors and text analysis of ~230,000 reviews to show large hosts' 15% price premium mostly reflects bigger homes (2-5% like-for-like), while guests report more problems

CREDIT RISK CLASSIFICATION MODEL Team Capstone, CSUN *Spring 2026*

- Built end-to-end scikit-learn pipeline (cleaning, leakage removal, feature engineering, ColumnTransformer for reproducible preprocessing), enabling reliable loan risk-grade predictions on unseen applicant data
- Trained and compared four classifiers (Logistic Regression, Decision Tree, Neural Network, Random Forest), selecting Logistic Regression (AUC = 0.77) for the best test recall and F1 and most stable generalization
- Ran cost-sensitive threshold analysis, recommending 0.10 decision threshold that favors rejecting risky loans over approving them to minimize costly defaults

Technical Skills

- **Programming & Data:** Python (pandas, scikit-learn, statsmodels), SQL, REST APIs; currently building AI agents
- **Analysis:** Regression, forecasting & time series, machine learning, statistical testing, financial modeling & valuation, text analysis, spatial analysis
- **Visualization & Tools:** Tableau, Excel, matplotlib
- **Languages:** French (Native), English (Bilingual)

Key Courses Taken

- **MSBA (CSUN):** Database Management, Data Visualization & Communication, Data Mining & Predictive Analytics, Programming, AI Governance, Prescriptive Analytics for Business
